

## 12 STL Data

## 12.0 STL DATA

TMS offers the user a 2 ways to view the STL:

- Via Reports.
  - **Hint:** The Data is static. The only thing that can be done with reports are:
    - View and Print the training lines.
    - Email the reports.
- Via STL Data.
  - With STL Data, the user can:
    - View the STL
    - Navigate to different windows of TMS from the STL screen (i.e. view additional MASL Details, Location Information etc. about the training from the STL window.)
    - The **user can also make manual changes to the STL** to play “what if games”.
      - **Hint:** Manual changes to the STL by the SAO **ARE NOT** uploaded to the SAN and into the MILDEP DSAMS system.
      - **Hint:** Once manual changes are made in TMS, the local copy of the STL on the computer, will no longer reflect the “Official STL” programmed by the MILDEPS.
      - **Hint:** The manual changes made by the user will be deleted and overwritten with the next import of the STL from the SAN!

The following illustrates how to view STL data. For STL Reports, see the Reports section of the TMS User Guide.

### 12.1 VIEW STL DATA

► From the TMS Main Menu:

- Click, the “**Training**” dropdown box.
- Select “**Training Lines (STL)**”
- Enter your criteria
- Click, “**OK**”

- “Training Track Lines” list window will appear.
- Locate the training line to view. **Double click** that line.

| Training Track Lines/STL     |       |             |            |                 |                 |                                |            |                |                 |            |           |           |

Training Line Detail window

## 12.2 TRAINING LINE DETAIL WINDOW, BODY

The following illustrates the various sections of the Training Line Detail window:

- Line List: Lists the training lines within the WCN that are programmed (i.e. Suffix A and B lines listed for Track/WCN 1000). Double click the line to see its details.

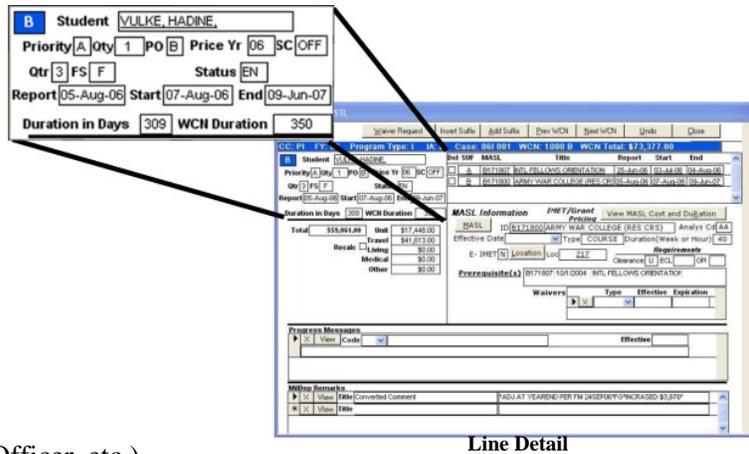

**Line List**

| Del                      | SUF | MASL    | Title                      | Report    | Start     | End       |
|--------------------------|-----|---------|----------------------------|-----------|-----------|-----------|
| <input type="checkbox"/> | A   | B171807 | INTL FELLOWS ORIENTATION   | 25-Jun-06 | 03-Jul-06 | 04-Aug-06 |
| <input type="checkbox"/> | B   | B171800 | ARMY WAR COLLEGE (RES CRS) | 05-Aug-06 | 07-Aug-06 | 09-Jun-07 |

Line List

- **Line Detail:** Specific Details about the training line being displayed. Refer to the Reference Tables and Glossary for code definitions.

- **Student:** Student assigned to the line.
- **Priority:** A, B, D
- **Qty:** Number of students
- **PO:** Program Originator
- **Price Yr:** Fiscal Year (does not include 5<sup>th</sup> quarter)
- **SC:** Student Code (“OFF” for Officer, etc.)
- **Qtr:** The Quarter for which the training is programmed.
- **FS:** Funding Status: Attempts to identify whether the line of training is funded or not. (“U” for Unfunded, “F” for Unfunded) *Due to inconsistent use by the MILDEPs, do not take this as fact. If there is a question contact your CPM.*
- **Status:** Indicates the Status of the training line displayed. (i.e. “P” for Programmed, “C” for Confirmed, “EN” for Enrolled, etc)
- **Report, Start, End:** Report, Start and End dates for the training line being displayed.
- **Duration in Days:** Duration of training for the line being displayed.
- **WCN Duration:** Duration for all lines of training in the Training Track.

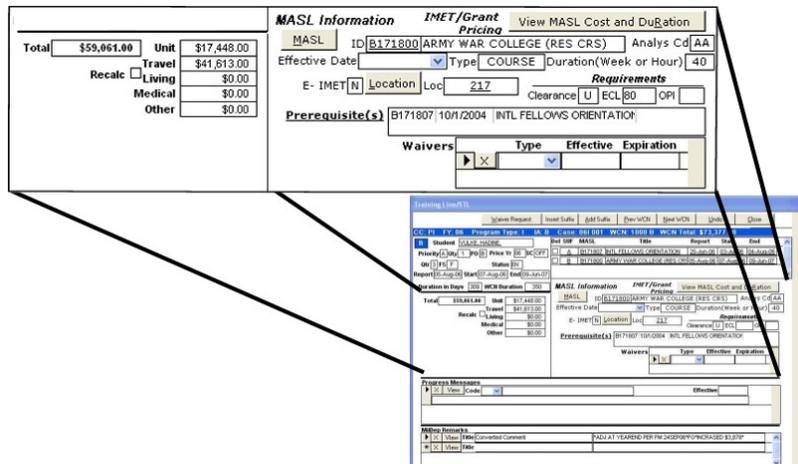

Line Detail

- **MASL Details:** Identifies specific course information that is assigned to the displayed training line.

**Hint:** Double Click: the “ID” and “Loc” fields to see additional information about the course or the Location identified.

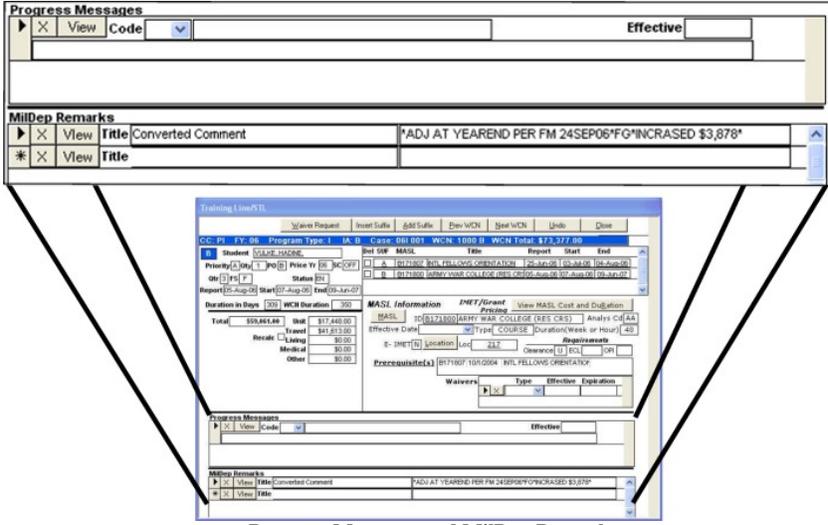

**Hint:** If the course has a prerequisite it will be identified in the **Prerequisite(s)** field. Click the course identifier in the Prerequisite(s) field to see the details of the Prerequisite Course.

MASL Details

**Hint:** The **costs** shown on this window are only the costs for the Training Line that is displayed. It is not the Total Cost of all training lines programmed for the WCN. For the Total Cost of the WCN, see the blue bar at the top of the window. (i.e. WCN Total: )

- Progress Messages:** Messages from the IMSO or the MILDEP Country Program Manager identifying the Status or Progress of the student/training line at a specific point in time are displayed in the Progress Messages section of the window. (i.e. “EN” for Enrolled as Scheduled, “CD” for Completed Training with Diploma as Scheduled, etc.)

- MILDEP Remarks:** MILDEP Remarks at the bottom of the window will display specific remarks from the MILDEP.

Progress Messages and MilDep Remarks

**Hint: Manual Changes:** Most fields on the Training Line Detail window can be manually changed. This would be done in emergency situations in order to create a last minute critical ITO (in the event the user cannot wait for the change to appear in the MILDEP STL that is downloaded to the SAN) or to perform “what if” analyses. Be ware, changes to the STL on this screen ARE NOT uploaded to the SAN and MILDEP Systems. In addition, your STL no longer reflects the official STL from the MILDEP (until your next STL import).

## 12.3 TRAINING LINE DETAIL WINDOW (BUTTONS AT THE TOP)

The following explains the buttons at the top of the Training Line Detail window.

Training Line Detail window, Buttons

**Waiver Request** button:

- To create a waiver request for the Training Line being displayed in the window, click the **Waiver Request** button.

- ▶ To create an IMET waiver:
  - From the “Training Line Detail” window,
  - Click, the **Waiver Request** button.
  - “IMET Waiver Request” window will open.
  - Enter data in the appropriate fields.
  - (To Print the waiver request, click the **Print** button at the top of the “IMET Waiver Request” window.)
  - Click **Save/Close** button to save the data and return to the Training Line Detail window.

**Insert Suffix** button:

- Manually insert a line of training into the WCN training track being displayed.
- ▶ To manually insert a line of training:
  - From the “Training Line Detail” window,
  - Click, the **Insert Suffix** button.
  - “Insert Suffix” window will appear.
  - From the dropdown box, select the line that you wish to insert the new line IN FRONT OF.
  - The Training Line Detail window will reappear as a blank line. The training line will be inserted in the WCN track and the remaining training lines of the track will be “renumbered”.
  - Enter values in the appropriate fields of the window.
  - Click, the **Close** button.
  - Training Track Lines list window will appear with an indicator next to the line you manually changed.
  - Click, the **Close** button.
  - “Save Edits in Pending Change File?” window will appear.
  - Click, the **OK** button.
  - The local copy of the STL (on your computer) will now include the training line that was added.
- **\*\*Rule!**: To incorporate this change into the “Official STL”, the SAO must notify the MILDEP Country Program Manager (by telephone or e-mail) of the change. If approved, the MILDEP will make the change in the “Official STL” which the SAO can subsequently download from the SAN.

**Add Suffix** button:

- Manually add a line of training at the end of the WCN training track being displayed.
- ▶ To manually add a line of training at the end of a track:
  - From the “Training Line Detail” window,
  - Click, the **Add Suffix** button.

- The Training Line Detail window will reappear as a blank line. The new training line will be added to the end of the track and identified with the next sequenced suffix character. (i.e. 6001A, 6001B, 6001C)
  - Enter values in the appropriate fields of the window.
  - Click, the **Close** button.
  - Training Track Lines list window will appear with an indicator next to the line you manually changed.
  - Click, the **Close** button.
  - “Save Edits in Pending Change File?” window will appear.
  - Click, the **OK** button.
  - The local copy of the STL (on your computer) will now include the training line entered.
- **\*\*Rule!:** To incorporate this change in the “Official STL”, the SAO must notify the MILDEP Country Program Manager (by telephone or e-mail) of the change. If approved, the MILDEP will make the change in the “Official STL” which the SAO can subsequently download from the SAN.

**Previous WCN** button:

- View the details of the previous WCN.

**Next WCN** button:

- View the details of the next WCN.

**Undo** button:

- Undo recent manual changes on the STL Detail window that have not been saved.
