Authorization: Section 38, AECA [22 U.S.C. 2778]

Appropriation: Normally purchasing country cash, but with limited exceptions (approval by DSCA), certain countries may use FMFP funding

Guidance:

1. International Traffic in Arms Regulations (ITAR) [22 C.F.R. 120 – 130]

Countries Eligible: Any country not prohibited by 22 C.F.R. 126.1

Value of Program:

1. \$33B in defense articles licensed during FY2012.

 - a. Not all licensed transfers take place

Restrictions:

1. Applicant must register with State Department.
2. Any defense article, service, or technology in the USML requires an export license.

During FY2013-2014 as a part of significant export reform, DoS overhauled the USML allowing the transfer of certain military articles and services (generally non-lethal) from the USML to the commerce control list (CCL) as a “600 series item” to be regulated by Commerce Dept IAW the Export Administration Regulations (EAR).
 - a. However, new Sec. 38(f)(5), AECA, allows the President to approve the transformation of any MDE within the 600 series CCL to a defense articles if determined to be in the U.S. national interest and the SFRC and HFAC are notified IAW Sec. 36(b)(5)(A), AECA.

2. DTSA provides any requested DoD recommendations to PM/DDTC regarding technology transfer for any license to be issued
3. State notifies Congress IAW Sec. 36(c) or 36(d), AECA, as required prior to issuing any license
4. After any congressional notification, PM/DDTC issue export license to U.S. industry
5. PM/DDTC manages end-use monitoring program (Blue Lantern) for DCS IAW Sec. 38(g)(7), AECA, normally with the country team political-military attache

Example: Lockheed-Martin sale of F-16s to UAE, Boeing sale of C-17s to UK, or sale of F-15s to Singapore. 2. All drawdowns are to be notified to Congress. Sec. 506(a)(2), FAA, drawdowns for INCLE and anti-terrorism purposes require a 15-day advance notification.
3. The value of the drawdown normally includes any initial logistics and training support and transportation costs to be funded by the implementing agency.
4. DSCA Handbook for Drawdown of Defense Articles and Services, H-1, Jun 2004, (http://www.dsca.mil/sites/default/files/drawdown_handbook_2004b.pdf) provides guidance for the drawdown program within DoD.

Countries Eligible: As determined by the President

Value of Program: Variable

Restrictions: This authority is last resort for emergency assistance. Providing USG agencies are normally not reimbursed.

Key Players: President, SecState, SecDef, USDP, DSCA, applicable implementing agency, applicable CCMDs, and country teams to include the SCO if defense articles and services are to be provided.

Execution: The country team and CCMD express urgency to both DoS and DoD

Example: All USG and partner nation funding authorities have been exhausted and urgent assistance is required immediately for a military threat or natural disaster. A recent example includes the presidential determination of 11 Feb 13 to drawdown \$50M in military assistance services [IAW Sec. 506(1)(a)] for Chad and France to counter terrorists and violent extremists within Mali. A more recent example includes the PD of 10 Dec 2013 to drawdown \$60M in DoD articles and services in support of operations in Central African Republic. On 11 Aug 14, a PD was published authorizing the drawdown of \$10M in DoD articles and services support of France in its C/T operations in Mali, Niger, and Chad. On 10 Sep 14, a PD was published authorizing the drawdown of \$25M defense articles, services, and training to Iraq to include the Kurdistan regional govt. On 24 Sep 14, the President delegated to SecState to authorize the 506(a)(1) drawdown of up to \$5M of defense articles and services and the 552(c)(2) drawdown of nonlethal commodities and services for the government of the Ukraine.

Authorization:

1. With a presidential U.S. national security interest determination, the normal 15- and 30-day advance congressional notifications may be waived for AECA-required DCS, FMS, third party, and leasing transfers
2. Section 614, FAA [22 U.S.C. 2364], authorizes the President to furnish assistance without regard to the FAA, AECA, and any related act authorizing or appropriating funds for use under the FAA when determined and notified in writing to Congress it is important to U.S. national security interests.
 - a. Section 614(a)(4)(A)(i), FAA -- Not more than \$750M in AECA-authorized sales may be authorized IAW this authority in any fiscal year

 - i. Section 614(a)(4)(C), FAA -- Not more than \$50M of this \$250M authority may be allocated to any one country in a fiscal year unless the country is a victim of active aggression.
 - c. Section 614(a)(4)(C), FAA -- Not more than \$500M of the aggregate \$750M and \$250M authorities may be allocated to any one country in a fiscal year
 - d. Section 614(a)(4)(A)(iii) -- Not more than \$100M of foreign currencies accruing under the FAA or any other law may be made available IAW this authority in any fiscal year
 - e. Section 614(c), FAA – authorizes the President to use amounts not to exceed \$50M of the funds made available IAW FAA pursuant to his certification that it is inadvisable to specify the nature of the use of such funds
 - i. However, the President shall fully inform the chairman and ranking minority member of both the HFAC and SFRC of each use of such authority

Appropriation: Except for the transfer of already appropriated but not obligated funds, none.

Guidance: Requires significant justification by SecState and SecDef to the President

Countries Eligible: As determined by the President

Value of Program:

Restrictions: A diplomatic 505 agreement is needed

Key Players: The affected country, U.S. Ambassador, applicable CCMDs, SecDef, SecState, regional and functional bureaus and agencies, OMB, NSC, and the President

Execution:

1. Country team (SCO) forwards request with country team endorsement
2. CCMD provides an additional endorsement
3. USDP(DSCA) coordinates within OSD and provides recommendation to DoS
4. DoS obtains presidential determination as required and forwards to DoD for implementation
5. DSCA any required congressional notification and forwards to the Implementing Agency for implementation

Example: A friendly country is under attack or the threat of an immediate attack from another country but is unable to counter either because of capability or financial restrictions. With an emergency determination, the President may direct the emergency provision of defense articles or services to the country or redirect unobligated assistance funding to fund immediate U.S. military assistance to the friendly country. Note: this authority is last resort and rarely used. On 30 Sep 2014, the President, IAW Sec. 614, authorized SecState to furnish up to \$123M in INCLE assistance to the following ten countries: Ukraine, Tunisia, Honduras, El Salvador, Guatemala, Costa Rica, Panama, Nigeria, Albania, and Vietnam without regard to any provision of law.

Section 22, AECA [22 U.S.C. 2762], authorizes the President, without requirement to for charge to any appropriation or contract authorization otherwise provided, enter into contracts for the procurement of defense articles and services for sale for U.S. dollars to any foreign country or international organization with reimbursement to the USG.
3. Section 29, AECA [22 U.S.C. 2769], authorizes the President to sell design and construction services to any eligible country or international organization if such country or organization agrees to pay in U.S. dollars not less than the full cost to the USG of furnishing such services. The services may be provided by the USG or contract.
4. SAMM, Chapter 15, provides procedures within DoD to manage the purchase of defense articles and services for selected countries or international organizations using DoD or other agency funds with the use of established "Pseudo-LOA" procedures.

Appropriation: None, only an authority using country cash, FMFP or DoD SC program funding

Guidance:

1. FMS sales are DoD's response to a country's letter-of-request (LOR), all subject to the technology transfer decision process, approval by DoS, and advance notification by DSCA to Congress for approval
 - a. Proposed FMS LOAs are generated by the DoD implementing agency (IA) which will either provide from inventory or enter into contract once approved by the USG and the purchasing country.
 - b. FMS LOAs have standard terms and conditions for the sale.
 - c. Purchasing country approval will also include any required funding determined necessary for implementation.
2. Pseudo LOA sales are DoD's response to a USG memorandum-of-request (MOR) to be funded by the requesting agency, also subject to technology transfer decisions, concurrence of DoS, and advance notification by USDP and USDC to Congress.
 - a. The proposed pseudo LOA is generated by the DoD implementing agency which will provide from inventory or enter into contract once approved by the USG requesting agency.

- b. The pseudo LOA is accepted and funded by the requesting USG agency. Delivery is to the requesting USG agency for subsequent transfer to the benefiting country.
- c. Benefiting country must have a current “505 agreement” in place with the USG.

Countries Eligible: Those determined eligible IAW Sec. 3, AECA –

- 1. Presidential determination (PD) that sales to a country or international organization will strengthen U.S. security and promote world peace,
- 2. Recipient agrees not to retransfer without presidential consent (delegated to SecState),
- 3. Recipient agrees to limit use of articles/services to the purpose for which they are furnished,
- 4. Recipient agrees to maintain substantially the same degree of security for the article or service as that provided by the USG, and
- 5. Recipient is otherwise eligible.

- 4. FY2014 -- \$34.2B in total sales (both FMS and pseudo-LOA) to include \$31.2B in FMS sales.

Restrictions:

- 1. Not otherwise ineligible by USG export law for such transfers
- 2. FMS transfer of ships require specific legislation for each case [10 U.S.C. 7307]

Key Players: Recipient or benefiting country, country team (to include SCO), CCMD, implementing USG agency, DoD/DSCA/DTSA, DoS/PM/RSAT,

Execution:

- 1. Submission of LOR by partner country for FMS LOA, or MOR by USG agency for pseudo-LOA
- 2. Technology transfer decision coordinated by DTSA
- 3. DoS/PM/RSAT coordination
- 4. Notification to Congress as required
- 5. LOA/pseudo-LOA acceptance with funding
- 6. DoD issuance from inventory or letting of contract with U.S. industry
- 7. Transportation to and acceptance by purchasing country
- 8. DSCA manages end-use monitoring program (Golden Sentry) for FMS IAW Sec. 40A, AECA, with implementing agencies, CCMDs, and SCOs.

Example: Pseudo LOA (DoD-funded) H-17 helos with support for Afghanistan and Pakistan, FMS (country cash) funded F-15s with support for Saudi Arabia, FMS (country cash) funded logistics and training support for Singapore DCS-purchased F-15s , FMS FMFP-funded purchase of F-35s for Israel.

Foreign Military Financing Program (FMFP)

Description: Financing of the purchase of defense articles and services

Purpose: SecState will request annual foreign assistance appropriations to fund country purchases of U.S. defense articles and services normally via the FMS process

Authorization: Section 23, AECA [22 U.S.C. 2763]

Appropriation:

1. FY2014 -- \$5,919M, S/FOAA, FY2014, Div. K, P.L.113-76. 17 Jan 2014.
2. FY2015 -- \$5,881M, S/FOAA, FY2015, Div. J, P.L.113-235, 16 Dec 2014.

Guidance:

1. FY2014 OCO FMFP remains available through FY2015 with FY2015 OCO available through FY2016.
2. FY2015 FMFP earmarked as follows:
 - a. \$3,100M for Israel of which \$815.3M is available for procurement in Israel
 - i. Generally represents about 20 percent of the Israeli defense budget
 - b. \$1,300M for Egypt after specified significant SecState certifications and reports to Congress.
 - c. Not less than \$1B of combined FY2015 ESF and FMFP shall be made available for Jordan.
 - d. \$904M authorized during FY2015 for the DSCA-managed FMS admin fund

Countries Eligible:

As originally justified in the SecState applicable fiscal year Congressional Budget Justification (CBJ) and later, after appropriation, allocated by DoS/DFA to DoD/DSCA for implementation and administration.

1. Since FY2010, FMFP, in consultation with Congress, may be used by SecState for support of foreign security forces. Pseudo LOA-like procedures are used for this very limited authority. State/PM issued Grant Military Assistance Guide (GMAG) [classified CUI-FOUO] was promulgated via SECSTATE msg 102112Z Apr 14 to the country team P-M and SDO/DATT officers in April 2014. This expedited procedure process is referred to as State Department Directed-FMFP procurement (SDD-FMF) and initiated by State Dept using MOR and MOA procedures with DoD/DSCA.

Value of Program:

FY2015 -- \$5,881M in grant aid

Restrictions:

1. Unless justified by SecState, in coordination with SecDef, no FY2015 FMFP funding is to support or continue any program initially funded under the DoD "1206" Building Capacity of Foreign Military Forces.

- a. However, DoS requested \$3M in FMFP for FY14 (\$5M for FY15) for establishing the European Expeditionary Capability Fund (ECF). The purpose is to support capability sustainment for European countries similar to the expeditionary capabilities gained from previous coalition operations Afghanistan. Procedures are still in development.
2. DoD/DSCA authorized to approve funding of DCS with FMFP for the following countries: Israel, Egypt, Jordan, Morocco, Tunisia, Turkey, Portugal, Pakistan, Yemen, and Greece [SAMM, C9.7.3]. FMFP is normally used to fund FMS cases and, by policy, its use for DCS is very much an exception. DSCA guidance for the use of FMFP for DCS is further referenced at <http://www.dsca.mil/resources/foreign-military-financing-direct-commercial-contracts-fmf-dcc>.
3. By policy, FMFP should not be used for the purchase of consumable non-lethal articles or services unless a part of a system sale or for subsequent sustainment support.

Key Players: Country team/SCO, CCMD, DoD/USDP/DSCA, DoS/PM, DoS/DFA, OMB,

Execution:

1. Though FMFP is the AECA and S/FOAA-legislated term, the community often uses the terms FMF, FMF credit, FMS credit.
2. Country team/SCO provides recommended funding levels through both the diplomatic and military chains-of-command nearly two years in advance
3. DoS/PM provided CUI-FOUO FMFP procedures within the Grant Military Assistance Guide (GMAG) of April 2014 to all country team pol-mil officers and SDO/DATTs
4. Coordinated by DSCA within DoD/USDP for recommendation to DoS
5. DoS/DFA coordinates within DoS for justifications and entry into the upcoming budget year congressional budget justification (CBJ)
6. After numerous congressional hearings for final appropriation, funding allocated by DFA to DoD/DSCA for implementation and administration generally via the FMS process

Example: F-16 follow-on support for Poland or modification and inspection of H-1 helos and engines originally provided as grant EDA to Hungary. Israeli and Egyptian purchase of U.S.-origin defense articles and services.

2. IMET is generally meant for professional military and education (PME) and only by exception for technical training.
3. IMET is generally meant for tuition expenses but by exception can be used for travel and per diem expenses for developing countries.
4. Other than English language laboratories, IMET funding is not to be used for purchase of articles.
5. The FMS process is NOT used for the implementation of IMET.

Countries Eligible: As justified and determined by SecState

Execution:

1. Country team/SCO provides recommended funding levels through both the diplomatic and military chains-of-command nearly two years in advance
2. Coordinated by DSCA within DoD/USDP for recommendation to DoS
3. DoS/DFA coordinates within DoS for justifications and entry into the upcoming budget year congressional budget justification (CBJ)
4. After numerous congressional hearings for final appropriation, funding allocated by DFA to DoD/DSCA for implementation and administration with the implementing agency training community and the SCOs.

Example: Initial FY2011 allocations -- \$977k for Kenya, \$1,800k for Indonesia, \$4,000k for Turkey, \$3,700k for Jordan, \$2,500k for Lebanon, \$1,695k for Colombia, and \$4,100k for Pakistan

Leases of Equipment

Description: Lease of DoD defense articles to eligible countries or international organizations

Purpose: Presidential determination there are compelling U.S. foreign policy and national security reasons for providing such articles on a lease basis rather than a sales basis

Authorization: Sections 61- 65, AECA [22 U.S.C. 2796]

Appropriation: None, normally country cash

Guidance:

1. The articles are not needed for the time needed for public use
2. The effect of the lease on the national technology and industrial base is considered, particularly to the extent to which the lease might reduce the opportunity to sell new equipment to the country to receive the lease
3. Conducted using a lease agreement with a payment schedule using country cash in U.S. dollars
4. The cost of the lease will include any depreciation experienced by the USG during the lease; however, may be waived if:
 - a. Leases for the purpose of cooperative research and development,
 - b. Leases for military exercises,
 - c. Leases for communication or electronics interface projects, or
 - d. Leases of articles which has passed 3/4 of its normal service life.

7. The lease agreement is to be of a fixed duration not to exceed five years, but it is renewable.
8. Any new or renewed lease exceeding one year is to be notified to Congress for approval. Congress may disapprove a lease based on dollar value thresholds exceeding \$50M (\$14M MDE). NATO plus five countries thresholds are \$100M (\$25M MDE)
9. SecState must approve any leases by DoD.

Countries Eligible:

Those determined eligible IAW Sec. 3, AECA –

2. FMFP may not be used for leasing [SAMM, C11.6]
3. The title of the leased item does not transfer to the leasing country, with the article to be returned to the USG at the end of the lease period

Key Players: Leasing country, country team (SCO), CCMD, Implementing Agency, DoD/USDP/DSCA, DoS/PM/RSAT, and Congress

Execution:

1. Country submits request for lease to DoD (DSCA) with SCO endorsement
2. Implementing Agency determines feasibility and generates the proposed agreement
3. DSCA coordinates within USDP and with DoS/PM/RSAT
4. DSCA notifies Congress as applicable
5. Country accepts terms of lease agreement with lease payments
6. Country team (SCO) end-use monitors during the duration of the lease
7. Country returns the article upon completion of the lease period (or renew the lease)

Example:

1. Country has a temporary need for an article and opts to lease rather than purchase
2. Country opts to lease articles for CONUS training purposes.
3. Iraq is reported to lease six Apaches for training purposes in preparation for receipt of purchased 24 Apaches. The estimated value of the supporting FMS case for logistics and maintenance support, training ammo and personnel training is \$1.37B.

Excess Defense Articles (EDA)

Description: Transfer of defense articles determined no longer needed by the USG either on a grant basis or by FMS sale

Purpose: Providing no longer needed USG defense articles to countries justified to receive such assistance

Authorization:

1. Section 21, AECA [22 U.S.C. 2761] by FMS
2. Section 516, FAA (22 U.S.C. 2321j) by grant transfer

Appropriation: None, only an authority.

Guidance:

1. Secretaries of military departments declare items excess to their mildeps causing them to be available for transfer to other USG agencies, local governments, or foreign governments eligible to receive them either by FMS or grant transfer
 - a. Major end items are normally retained by the mildep for final disposition
 - b. Minor end items and parts are normally retained by DLA for final disposition
2. SecState/PM/RSAT coordinates and provides DoS approval to DoD/DSCA for any required congressional notification prior to transfer
3. In each case, the recipient must be determined eligible to receive the applicable technology
4. Once approved for transfer, a joint visual inspection (JVI) of the EDA is strongly encouraged [SAMM, C11.5.5] prior to transfer

Countries Eligible:

1. Countries determined eligible for FMS are normally eligible for FMS EDA
2. Countries eligible for grant EDA are identified and notified to Congress via a joint DSCA/State FOUO letter to Congress each fiscal year.
3. Prior to grant transfer, the recipient country must enter into a Sec. 505, FAA, agreement (a DoS diplomatic process) which includes the following stipulations:
 - a. Limits use to government officers, employees, and agents
 - b. Does not permit unauthorized transfers
 - c. Does not permit use for purposes other than those for which furnished

1. FY2012 -- \$284M (current value) offered by FMS, \$79M delivered
2. FY2012 -- \$11M (current value) offered by grant, \$13.3M delivered.

Restrictions:

1. If by FMS, generally priced based on usability ranging from 5 to 50 percent of its origin acquisition value
2. If by grant, the concept is “as is-where is.”
 - a. Articles are drawn from existing DoD stocks
 - b. No DoD procurement funds are to be expended for the transfer
 - c. The transfer will not have adverse impact on U.S. military readiness
 - d. Must be determined that the grant transfer is preferable over a sale based on any accrued U.S. foreign policy benefits to be gained
 - e. Must be determined to have no adverse effect on opportunities for any sale by U.S. industry
3. Excess construction, emergency, or firefighting equipment or vehicles are not eligible for the EDA sales or grant transfer programs
4. Total current value of grant EDA transfers in one fiscal year is not to exceed \$500M.
5. Grant transfer of ships require specific legislation for each case [10 U.S.C. 7307]

Key Players: Military department, DLA, country team (SCO), CCMD, DSCA, State/PM/RSAT, Commerce Dept

Execution:

1. Country identifies a requirement for possible EDA to the SCO
2. SCO forwards the request with any endorsement
 - a. The SCO must ensure the country understands EDA generally means there is no promise of future support of any sort, and any modification or transportation expense is to be reimbursed to the USG
3. CCMD endorsement can assist to allocate in the case of competing requirements
4. Mildeps determine if EDA exists
5. DSCA coordinates with DoS and Commerce to determine eligibility and allocation among the requirements
6. Congressional notification completed by DSCA for grant EDA transfer of significant military equipment or any transfer exceeding \$7M
 - a. FMS EDA notifications are IAW Section 36(b), AECA, with the FMS LOA process used for the transfer by sale
7. USDP/DSCA approves the transfer for implementation by the applicable mildep or DoD agency

Example:

1. Countries purchase weapons systems (or parts) no longer needed by the USG but is to remain in the purchasing country inventory. \$10.8M in EDA were overall authorized during FY2012.
2. Developing countries use the grant EDA program for both end items and parts for economic reasons
3. Israel is reported to receive about 2,400 vehicles and an unspecified number of MLRS systems via grant EDA
4. Jordan accepted 35 MRAPs in Nov 2013 [excess from U.S. SWA draw-down].

- Countries must be otherwise eligible by export law for such assistance
- Coordinated with DoS
- Notified to Congress prior to obligation or transfer
- Building Partner Capacity (BPC) programs generally encompass S.C. and S.A. activities that are funded with USG (DoD or DoS) appropriations and administered as cases within the FMS infrastructure (pseudo LOAs) to include the following (SAMM, 15.1.4):

Example: A young, educated English-speaking officer candidate shows promise to be successful as an undergraduate student and is navy/coast guard career material. The country's navy is generally equivalent in size and mission as the USCG. Attendance at the USCG academy appears to be the answer for his further education and establishing a long-term positive relationship with the U.S. To date in 2013, 117 international cadets from 37 countries have graduated from the Academy with 19 currently enrolled.

2. Applicable mildep approves the request
3. Applicable training organization enrolls the student.

Example: A country's security cooperation management organization urgently needs security cooperation training and cannot obtain an immediate CONUS classroom quota. The country requests that the student be allowed to enroll in a basic DISAM distance learning course. An example DL lesson would be the writing of LORs with enrollment and access using the DISAM web site.

Key Players: Country team (SCO), CCMD, DSCA, SAF

Execution:

1. Country team (SCO) forwards ALP request to CCMD for endorsement and forwarding to SAF
2. Managed within the S.A. training environment using TMS procedures

Example: A lesser-developed country air force has a young bright career potential officer who is an ideal candidate for flight school. However, the country cannot afford the tuition and per diem required for the necessary English language and flight school training. The country desperately needs qualified pilots to support coalition operations with the U.S.

Value of Program:

Restrictions:

Key Players: SCO, CCMD, DSCA

Execution:

1. Country is authorized to receive a VIP tour generally in the U.S.
2. The SCO is required to provide an escort officer
3. A request is submitted via the CCMD to the applicable MilDep to use IMET or FMFP funding allocated to the country
4. DSCA approves the use of this funding to cover the expenses of U.S. tour director

Example: It is determined important by the SCO, CCMD, and MilDep that the developing partner nation conducts a whirl wind tour of U.S. installations with the group consisting of senior military officers and civilian personnel. The purpose of the tour is to establish relationships and also see and learn from viewing U.S. training facilities. None of the personnel have been to the U.S. before thus requiring a U.S. escort/tour director to ensure transportation, living services, and

access. The use of a SCO member already fluent in the country's language appears to be the best choice for the tour director duty. The SCO is not routinely funded to conduct this type of service.

Countries Eligible: As determined by SecDef

Value of Program:

Restrictions: International agreements for the exchange are to be in-place prior to the exchange

Key Players: Country team (SCO), CCMD, MilDep, DSCA

Execution:

1. DSCA and MilDeps specify what institutions are considered PME
2. Country team (SCO) forwards request for a reciprocal, no-cost exchange at a PME institution to the CCMD for endorsement
3. DSCA and applicable MilDep (or DoD agency) determine if necessary international agreements for the exchange are in-place. If not, then agreement negotiations must take place and be approved.

2. DSCA and applicable MilDep determine if necessary international agreements for the exchange are in-place. If not, then agreement negotiations must take place and be approved.
3. Once the agreements are approved, then the exchange offer may be accepted for implementation.

Example: The partner country has a well-functioning modern flight school program and, for interoperability purposes, wants to attend the comparable U.S. flight school but at no-cost. The applicable U.S. MilDep and related flight community have indicated an interest and support for the exchange. The CCMD is willing to strongly endorse the exchange.

Example: The SCO notes that the partner nation has a very professional unit with certain skills that might be of value to a comparable U.S. unit. Or the partner unit is lacking in certain skills that could be improved upon with U.S. training. Example skills could include cold weather training, mountain training, jungle training, or desert training.
