

CHAPTER 2

TMS Installation

Upgrade/Full Install CD:

The TMS 6.003 Installation/Upgrade CD can be used to perform a **full install** of TMS 6.003 in the event TMS is not already present on the computer or if you are currently using TMS Version 5. This CD will also **upgrade** an existing version of TMS 6 to version 6.003.

Installation Hints:

- **Back up** your existing version of TMS and SAARMS. (For Safety)
- **Do not remove** your existing version of TMS.
- **Print out** and **follow** the installation instructions provided on the CD.
 - Insert the CD.
 - The “Welcome Screen” will appear.
 - Double click the Notepad Icon for step by step instructions.
- If doing a **full install** of TMS 6.003, there are **two parts**.
 - Once “Part One” is finished, you will receive the following message; “TMS6 Setup was completed successfully.”
 - Click OK (Do not open TMS.)
 - Reinsert the CD to perform “Part Two”.
- If doing an **upgrade** to an earlier version of TMS 6, there is only **one part**.

Note for Windows NT users requiring a Full Installation:

- TMS 6.003 Full Install - If a previous attempt at installing an earlier version of TMS 6 failed (computer continually needed to be rebooted to update system files) **DO NOT** follow installation instructions on this CD. Go to DISAM’s web site, <http://www.disam.dsca.mil/itm/Automation/TMS/TMS6003.htm> , for **manual installation instructions**.
- TMS 6.003 Full Install - If this is the first time TMS 6 will be installed on the Windows NT computer; it is OK to follow the instructions provided on the CD.
