

CORRECTION TO "DEPARTMENT OF THE TREASURY REPORT: SURVEY OF OFFSET/COPRODUCTION REQUIREMENTS"

Under the "Documents" Section in the previous issue of the DISAM Journal (Volume 5/Number 4, Summer 1983, pp. 59-82) an article (subject as above) was published. Since that time, an error was discovered in Table 4 (page 68 of that issue). The corrected table (submitted by Department of the Treasury, Office of the Assistant Secretary for International Affairs, Office of Trade Finance) is provided below. The text of the original article concerned a survey conducted by the Aerospace Industries Association on "offset and coproduction commitments made to foreign governments in connection with major export contracts." The survey's objective was to "gather data on the nature and extent of offset/coproduction practices."

TABLE 4

Value of Reported Contracts and Offsets
by Recipient Country Group
(\$ millions)

Category	Value of All Reported Contracts	Value of All Reported Offsets*
OECD High R&D	2,313.4	1,478.4
OECD Medium R&D	7,437.0	5,666.2
OECD Low R&D	701.0	199.9
Other Nations	1,315.4	307.9
"NATO"**	1,662.1	1,040.3
Unknown	1,735.5	893.2
TOTAL	15,164.4	9,585.9

* Offset figures are not as precise as suggested by this table, since a number of offset commitments were given as "best efforts" or as a range of dollar values. See text.

** "NATO" in this case refers to the North Atlantic alliance as an entity, rather than to individual countries within it.

Note: OECD = Organization for Economic Cooperation and Development.
